

## NEED MORE SPACE?

Storage is one of the most important things in the home and there are few who don't 'Need more Space'. Most people will agree that a house can necessitate use of a storage facility, but can external storage be used on a smaller and more short term level?

Speaking with Colm Hefferon, General Manager of Need More Space, Trish Phelan asked Colm how easy and affordable it is to put your clutter into storage.

### **Lets look at a typical household that have no garage and need some space, what sort of facility can you offer?**

People with larger houses but no garage or shed will use the NMS self storage service to declutter and keep valuable furniture and equipment safe, but out of sight and out of the way. The smallest room we offer is 10 SQ/Ft, or approximately 1 meter cubed. The next full size room is 5 ft by 5 ft or 25 SQ/Ft with a full height of 8 feet. These are the most popular rooms we offer and have proved very popular with people renting and living in apartments as they give them the extra space they need for comfort and are relatively inexpensive ranging from €50 to €100 per month, including VAT.

### **Where are you Located?**

We have three convenient locations around Dublin (Santry, Deansgrange and Kylemore Road), NMS service North, South and West Dublin.

### **What's involved in booking space at one of your locations?**

It's easy, just Call, Book and Store. Our staff are trained to help you get the right amount of space for your needs and make the experience easy and stress free. Minimum storage is for only one week, so self storage with Need More Space offers great flexibility.

### **How does it all happen, does the client just arrive with a truck load of items or does it need to be pre-packed and boxed?**

It's self storage, so self service is implied. Customers generally call in family and friends, or rent a van for the day. That said, for larger scale loads many customers use professional moving companies to take the strain of the move out of their busy lives. Once the material is in, customers will come back regularly to remove or add items as they need them.

### **Your website says that you have your own 'room'. Does this mean you have individual space that you can easily come and go from?**

Yes, its your room to use it as you see fit, so if its to stay in long term storage or short term you can come and go as often as you wish, adding or taking from the room. Another benefit of the flexibility we offer is you can grow or shrink your room to different sizes as your needs require, so for example, if you start with a large room and begin filtering your stuff home, you can move the remainder to a smaller room thus reducing your costs.

### **And finally Colm, what about insurance and security. Does the client need to organise insurance or is this covered?**

Insurance should always be considered in terms of the value of the goods in storage. Need More Space can provide you with insurance for your goods. Alternatively most household insurance policies can be extended to cover goods stored with Need More Space.
